

COOLIFT

Mobile Fitness Tracker — UI / UX & Design System

Lift. Track. Evolve.

1. Brand Direction

Product: COOLIFT — a mobile-first personal workout and progress tracker.
Personality: Premium, energetic, modern, focused and simple.
Design philosophy: A serious training companion rather than a generic gym logging form.
Primary UX: Open → Today's Workout → Log Set → Rest → Next Set → Complete.

2. Visual Identity

Use a dark fitness-tech aesthetic with rounded surfaces, strong typography, large numeric information, subtle gradients and clear workout-state feedback. Avoid unnecessary decoration.

3. Theme Options

Theme	Primary	Accent	Feel	Default?
Midnight	#070B14	#2688FF / #06B6D4	Premium / focused	YES
Aurora	#0B0814	#8B5CF6 / #EC4899	Modern / expressive	No
Forest	#07110D	#10B981 / #14B8A6	Natural / calm	No
Sunset	#140B07	#F97316 / #EF4444	Energetic	No

4. Midnight Color Tokens

Token	Hex	Purpose
Background	#070B14	App background
Surface	#0F1726	Cards / sections
Elevated Surface	#151F32	Inputs / elevated cards
Primary	#2688FF	Primary actions / active states
Secondary	#06B6D4	Secondary accent
Accent	#8B5CF6	Highlights
Success	#10B981	Completed sets / success
Warning	#F59E0B	Attention
Error	#EF4444	Errors
Primary Text	#F8FAFC	Main text
Secondary Text	#94A3B8	Supporting text

5. Typography

Use a clean modern sans-serif such as Inter. Use bold headings, medium labels and regular supporting text. Workout numbers such as weight, reps, timer and PR values should use larger high-contrast typography.

Suggested hierarchy: App title 24–28px; screen title 20–24px; section title 16–18px; body 14–16px; supporting text 12–14px; workout numbers 20–32px.

6. Core Components

Component	Purpose
AppShell	Global mobile layout, safe areas and page structure
BottomNavigation	Home / Workout / History / Progress / Settings
WorkoutCard	Today's workout, exercise count and START WORKOUT CTA
ExerciseCard	Exercise target, previous performance and current status
SetRow	Weight + reps + completion; optimized for quick logging
RestTimer	Between-set timer with +30 sec and Skip
StatCard	Weight, volume, streak and workout metrics
ProgressChart	Simple mobile strength/weight charts
WorkoutHistoryCard	Completed workout summary
ExerciseHistory	Previous sessions and PR information
PrimaryButton	Main action with large touch target
BottomSheet	Mobile-friendly secondary actions
EmptyState	Helpful no-data state and next action

7. Home Screen

Header: Greeting + profile/avatar.

Today's Workout Card: Day, workout name, exercise count, estimated duration and START WORKOUT.

Weekly Overview: 7-day completed/planned/rest states.

Quick Stats: Current weight, weekly workouts and streak.

8. Workout Screen — Highest Priority

This is the screen used repeatedly inside the gym. Optimize for one-handed use, minimal typing and immediate feedback.

Barbell Bench Press
Target: 3 × 6–10
Last time: 60 kg × 10, 60 kg × 9, 60 kg × 8

Set 1 | 60 kg | 10 reps | ✓
Set 2 | 60 kg | 10 reps | ✓
Set 3 | 60 kg | 8 reps | ■

Prefill today's suggested weight/ reps from the previous completed session. Allow quick adjustment. Use numeric inputs and large completion controls.

9. Rest Timer

01:32

REST

[+30 sec] [Skip]

Default rest: approximately 2–3 minutes for compound movements and 60–90 seconds for isolation movements.

10. History

Use a calendar or grouped date list. Completed days should have a clear success indicator. Selecting a date opens the complete session with exercises, sets, weights, reps and duration.

11. Progress

Show current body weight, weight change, workouts completed, streak, total volume and exercise-level strength progression. Keep charts simple and readable on a phone.

12. Logo Concept

The COOLIFT logo should combine a stylized C with a dumbbell/lifting symbol. The C provides the brand connection and the dumbbell communicates fitness. Use negative space so the mark remains recognizable at small sizes.

13. Logo Variants

Primary: C + dumbbell icon + COOLIFT wordmark.

App icon: C + dumbbell symbol only.

Dark: White/light logo on Midnight background.

Accent: Blue/cyan gradient mark for splash and promotional surfaces.

Monochrome: Single-color black or white version.

14. Mobile UX Rules

- Minimum comfortable touch target: about 44px.
- Keep primary actions near the bottom/thumb reach.
- Avoid dense desktop tables.
- Use bottom sheets for secondary mobile actions.
- Keep important workout values visible without excessive scrolling.
- Save workout inputs locally immediately.
- Show offline/sync state without interrupting the workout.

15. Frontend Component Structure

```
src/

16. Implementation Rules for Antigravity

1. Build mobile-first; do not design desktop first and shrink it.
2. Use Midnight as the default theme.
3. Implement colors as CSS/theme tokens so alternate themes can be added later.
4. Build reusable components instead of duplicating workout-day UI.
5. Prioritize workout logging over decorative UI.
6. Make numeric inputs fast and touch-friendly.
7. Preserve workout state locally before network synchronization.
8. Keep animation subtle and functional.
9. Keep spacing, radius, typography and button states consistent.
10. The final product should feel like a polished fitness app, not an admin dashboard.

17. Brand Summary

COOLIFT

Lift. Track. Evolve.

Identity: personal + modern + focused + progressive.

Default: Midnight theme.

Primary: #2688FF.

Secondary: #06B6D4.

Logo: stylized C + dumbbell.

Device: mobile phone.

Core action: start and log today's workout.
